

DEEPAK JADON

Full Stack Developer (MERN Stack)

Mathura, Uttar Pradesh, India | +91 91493 70081 | deepakjadon1907@gmail.com

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack MERN Stack Developer with production experience building scalable web apps using React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+), and TypeScript. Delivered RESTful APIs, secure authentication (JWT, RBAC), and payment integrations at BrajMart EcomTech LLP. Skilled in API/database optimization, responsive web development, debugging, and CI/CD production deployment, with strong Git/GitHub collaboration in agile, PR-based workflows.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Vite, Responsive Web Development, Accessibility

Backend: Node.js, Express.js, RESTful API Design, Middleware Architecture, Debugging

Databases: MongoDB (Schema Design, Indexing, Database Optimization), Supabase (PostgreSQL)

Auth, Security & Payments: JWT, OAuth 2.0, RBAC, Input Validation, HTTPS/CORS Hardening, Payment Gateway Integration, Webhooks, Idempotent Transactions

AI Integration: Google Gemini AI (Resume Parsing & Matching)

Tools, DevOps & Fundamentals: Git, GitHub, Postman, Vercel, Render, Netlify, CI/CD, Production Deployment, DBMS, OOP, OS, Computer Networking

PROFESSIONAL EXPERIENCE

Full Stack Developer (MERN Stack)

Jul 2025 – Present

BrajMart EcomTech LLP — Vrindavan, India (On-site)

- Developed and maintained production-grade full stack web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js), JavaScript (ES6+), and TypeScript, improving UI responsiveness and cross-device performance by 40%; designed and optimized RESTful APIs with Node.js and Express.js, reducing average API response time by 25% through query and database optimization in MongoDB (indexing, lean projections).
- Implemented secure authentication and authorization using JWT and Role-Based Access Control (RBAC) across Admin and Customer roles, strengthening application security posture and access management.
- Delivered end-to-end payment integration with the PayU payment gateway, including webhook-based order reconciliation and idempotent transaction handling, achieving zero payment failures post-launch.
- Built responsive web development solutions with React.js and Tailwind CSS, performed systematic debugging and performance optimization across frontend and backend layers (35% reduction in production bugs), and managed CI/CD production deployment pipelines on Vercel and Render.
- Collaborated using a PR-based Git/GitHub workflow with structured code reviews across a 3-person engineering team, maintaining high code quality standards.

FEATURED PROJECTS

IntelliHire — AI-Powered Recruitment SaaS Platform

2026

- Built a full-stack MERN SaaS platform with Google OAuth 2.0, role-based portals for Recruiters and Candidates, and real-time application tracking; integrated Google Gemini AI for semantic resume parsing and candidate-to-job-description matching, cutting manual screening effort by 60%.
- Engineered RESTful APIs with Node.js and Express.js and deployed via CI/CD to Vercel (frontend) and Render (backend), maintaining an API response SLA under 300ms.

Stack: React · TypeScript · Tailwind CSS · Node.js · Express.js · MongoDB · Gemini AI · Google OAuth · JWT

BrajMart — Production-Grade E-Commerce Web Application

2026

- Developed an end-to-end MERN e-commerce platform covering product catalog, dynamic cart, secure checkout, order management, and an admin analytics dashboard, with PayU payment gateway integration using idempotency keys and webhook verification for PCI-compliant transactions.
- Achieved sub-2-second load times through lazy loading, code splitting, and Tailwind CSS purging as part of ongoing performance optimization; fully responsive across mobile and desktop.

Stack: React · TypeScript · Tailwind CSS · Node.js · Express.js · MongoDB · PayU · Vercel · Render

EDUCATION

Bachelor of Technology — Computer Science Engineering

Jul 2022 – May 2026

GLA University, Mathura, Uttar Pradesh, India | CPI: 7.51 / 10.0

OPEN SOURCE & ADDITIONAL ACTIVITY

Maintained full-stack MERN apps with active GitHub commits; completed NPTEL Leadership & Team Effectiveness, 2025.
